Aloha Fenix,

I hope this email finds you well. [Personal Matters / Ex. 6] continues to reach out to us. I am more than happy to get back to her either by email or phone but don't have very much to tell her. Last time you and I spoke, you mentioned that DOD was working with her and the residents. Do you have a contact person to whom I should refer [Personal Matters / Ex. 6]

FYI –

Doesn't she deserve a call to let her know that AH is the point of EPA contact?

It is not good that she continues to send messages my way, here's nothing from me yet continues to believe that I am her point of access.

Mr Wilson, I know you are very busy and if I need to address this with another person in the EPA I would appreciate it if you could please give me a contact. We just retested the indoor air of our home attached are the results. We are being relocated back to the mainland due to the medical issues our family is suffering, since the medical community here has not been able to find a cause and we have been exposed to these gases for the last 5 years of living here. SOMEONE need to help the residents of Hickam communities....there are other homes that have tested positive ours is the only one that has had multiple tests showing the fluctuations. These readings are higher then our original readings for Heptachlor and it is not even the hottest part of the year here yet. If there is someone else I should be contacting for this...please tell me. Thank you

According to the State of Hawaii only heptachlor was used to treat some homes. See the last paragraph of the file below under Heptachlor.

<http://eha-web.doh.hawaii.gov/eha-cma/Downloads/HEER/termicidefactsheetfinalsept2011.pdf>

Please see attached results.

Note: Detected large unknown peaks with retention times below that of heptachlor for both samples.

Best,

Dr. Cassidy

LaDean

Good Morning

Personal Matters / Ex. 6

Your question or inquiry to the "EPA Information Contact Form" regarding health-based action levels for several pesticide compounds has been referred to my office. I just attempted to phone you directly via the contact information provided (Phone number: 803-316-1550).

Please feel free to contact me directly via the contact information provided below. I would be happy to speak with you about various environmental screening action levels & their derivation. For your convenience, U.S. EPA's health-based Regional Screening Levels (RSLs) can be found at:

http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/Generic_Tables/docs/master_sl_table_run_JAN2015.pdf

Best Regards...

..patrick wilson
